

Product Data

Castrol DWF (Aerosol)

Water dispersant, penetrant and lubricant

Description

Castrol DWF is a de-watering and penetrating spray with a wide range of applications on a vehicle, in the home, in the office and in the workshop.

Castrol DWF is a multifunctional product which can be used as a water-displacing and anti-corrosion agent, electric contact cleaner, rust remover and universal lubricant.

Application

The superior creep characteristics of Castrol DWF ensures effective penetration, allowing easy extraction of corroded parts, making it ideal for use on automotive exhaust systems, wheel nuts and suspension units.

When used on damp engines, Castrol DWF leaves a water-repellent film on the distributor, plugs, coil, ignition, H.T. leads and battery terminals.

Using the extension tube provided, difficult to reach places, such as locks, cables, hinges and linkages can be lubricated with ease.

In the home and office, Castrol DWF can be used for lubricating items such as door hinges, fans, clocks and castors.

Attention: Do not apply to hot surfaces.

Advantages

Castrol DWF

- displaces water from metal surfaces
- frees corroded parts
- stops squeaks
- cleans and protects metals

Typical Characteristics

Name	Method	Units	Castrol DWF
Flash Point		°C	min. 70
Appearance			brownish, slightly turbid liquid
Density @ 20C		g/ml	min. 0.800
Odour			characteristic

Storage

All packages should be stored under cover. Where outside storage is unavoidable drums should be laid horizontally to avoid the possible ingress of water and damage to drum markings. Products should not be stored above 60°C, exposed to hot sun or freezing conditions.
